BP222

Manual Water Activated
Tape Dispenser

Economically priced, the Xtegra® Tegrabond® BP222 allows any size business to enjoy the carton sealing benefits of water activated tape:

security, strength and professional packaging.

Features & Benefits

- > Soft touch tape delivery
- > Easy push tape dispensing
- > Blade delivers clean, even tape cutting
- > Better Pack water brushes provide consistent, uniform tape wetting
- > Portable dispenser does not require electricity
- > Refillable and spill-resistant water tank holds one cup (227ml) of water to activate 114mtrs of tape
- > Push lever dispenses 254mm length of tape; repeat push lever for longer tape lengths

Eject and fill the water tank, then insert it back into place.

Remove cover to insert tape, then feed tape through slot.

Push lever to dispense tape to desired length (Additional pushes may be required).

Push cutter firmly to cut tape.
